Funding Opportunities & Awards

Funding Reminders:

Canadian Celiac Association Dr. J. A. Campbell Young Investigator Award
Canadian Cardiovascular Society Have a Heart Bursary Program

2023 Canadian Women's Heart Health Summit

Ongoing Events:

Women's Health Seminar Series
Evening Comparative Physiology Seminar
Neurology Grand Rounds Schedule
Comparative Physiology Invited Speaker Seminar
Neuroscience Research Colloquium

Events

Upcoming Events:

Co-Creating Digital Stories: Advancing equitable access to living donor kidney transplant through culturally relevant education
2023 Celebrate Research

Other Research Opportunities

Announcement Reminders:

Development of a simulation curriculum for diagnostic radiology resident physicians

Funding Opportunities & Awards

Funding Reminders:

Deadline	Award
30-Apr-23	Canadian Celiac Association Dr. J. A. Campbell Young Investigator Award
2-May-23	Canadian Cardiovascular Society Have a Heart Bursary Program

Upcoming Events:

19-Apr-23 (Hulburt Auditorium at St. Paul's Hospital, or Online)

Co-Creating Digital Stories: Advancing equitable access to living donor kidney transplant through culturally relevant education

Longstanding inequities in access to living donor kidney transplantation (LDKT) have been reported for the Indigenous and racialized communities in Canada. The BRIDGE to Transplant Initiative and the ACTION (Improving Access to Living Donor Kidney Transplantation in Communities Marginalized by Race and Ethnicity in Canada) project focus on addressing barriers to LDKT for Indigenous and South Asian communities in BC. In this presentation, we will review the role of digital storytelling in education around LDKT and discuss the key role of community and patient partners in the development of these interventions in BC.

Speaker: Dr. Jag Gill MD, MPH, FRCPC. Scientist, CHÉOS. Associate Professor, Division of Nephrology, UBC. Medical Director, Kidney Transplant Program, St. Paul's Hospital. Medical Director, Data and Quality, BC Transplant.

28-29-Apr-23 (Pan Pacific Hotel)

2023 Canadian Women's Heart Health Summit

Proudly hosted by the [University of Ottawa Heart Institute's Canadian Women's Heart Health Centre](#), [Heart & Stroke](#), the [University of British Columbia, Centre for Cardiovascular Innovation](#) and the [Leslie Diamond Women's Heart Health Clinic](#), the Canadian Women's Heart Health Summit is the only event of its kind and has become the national reference point for health professionals seeking up-to-date knowledge of women's heart, brain and vascular health. Building on the success of the previous three Summits, we have assembled national and international experts and stakeholders to further advance women's heart, brain, and vascular health. Together, we will transform and enhance Canadian women's lives through research, awareness, policy development, and care. This is an accredited opportunity for knowledge exchange for a variety of stakeholders including primary care providers, cardiologists, neurologists, gynecologists, pharmacists, nurses, cardiac rehabilitation providers, allied healthcare providers, researchers, policy-makers, community partners, and women with lived experience.

Ongoing Events:

Date	Time	Where	Seminar	Affiliation
Mondays	12:00-1:00pm	Virtual	Women's Health Seminar Series	Women's Health Research Cluster
Wednesdays	4:00-5:00pm	Biosci room 4223	Evening Comparative Physiology Seminar	Department of Zoology
Wednesdays	8:00-8:50am	Hybrid	Neurology Grand Rounds Schedule	Department of Neurology
Fridays	10:00-11:00am	Beaty Museum Auditorium	Comparative Physiology Invited Speaker Seminar	Department of Zoology
Fridays	11:00am-12:00pm	Hybrid	Neuroscience Research Colloquium	Djavad Mowafaghian Centre for Brain Health

Other Research Opportunities

Announcement Reminders:

Development of a simulation curriculum for diagnostic radiology resident physicians

Application deadline: applications will be received on an ongoing basis until August 2023

The University of British Columbia Department of Radiology is seeking medical students who are interested in medical education and diagnostic radiology to assist in the development of a simulation curriculum for diagnostic radiology resident physicians. Participating medical students will complete a mandatory orientation session and will then work independently to extract identified cases from the Vancouver General Hospital picture archiving and communication system (PACS), de-anonymize metadata, and upload cases to a commercially available PACS viewer. This educational opportunity will provide medical students interested in diagnostic radiology with invaluable experience both in the development of radiology-specific educational resources and in working directly in the radiology department. Participating medical students will have the opportunity to be involved as an author on medical education manuscripts arising from this work should they choose to be involved though this is not a requirement of involvement.

Medical students interested in participating should send a statement of interest no longer than 1 paragraph to Dr. Helena Bentley via email at bentley@alumni.ubc.ca.
